17. Emissions Overview (Informational Item)

Informational Overview on Emissions

Concerns regarding greenhouse gas (GHG) emissions compared to other CCAs and PG&E. **EBCE emissions were significantly higher than other CCAs** who demonstrated better overall performance than EBCE, with **lower nuclear content, higher renewables** and carbon free percentages, and/ or significantly **better cost savings**. Staff discussed and answered questions regarding the disparities. The 2025 goal of nearly 80% clean and the 2030 goal of 100% by 2030 is a good trajectory. We look forward to the 2022 numbers.

Questions from the CAC and the public demonstrate that a concise executive summary may help provide transparency for laypersons and those learning about electricity markets.
