Ava Community Energy

Powering Alameda County and the Valley with green, low cost energy.

East Bay Community Energy is now Ava™ Community Energy

Lower Rates

We offer green energy at lower rates for residents and businesses.

\$23M

projected savings in 2023–2024 fiscal year

Sustainability

As an Ava customer, you are helping transition regional energy supply to more solar and wind energy.

100%

carbon free electricity for all customers by 2030

Community Grants

We invest our net revenues back into local programs and non-profits.

\$4.7M

committed over the next three years to community innovation grants

Local Programs

Guided by our Local Development Business Plan, Ava invests in local renewable energy infrastructure.

\$26M

for 2023–2024 local programs

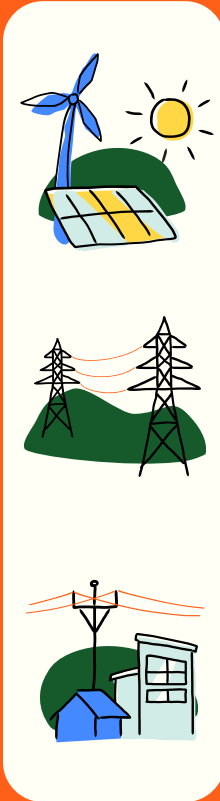

The Ava Scott Haggerty Wind Energy Center in Livermore

How It Works

We source clean energy through existing and new projects. As of 2024, Ava has contracted for 1,118 megawatts (MW) of new wind, geothermal, and solar power and 432 MW of new battery storage.

PG&E maintains the power grid to deliver energy to our community, manages outages, and handles billing.

You benefit from green energy, low rates, more energy options, additional energy programs, and local control of your energy provider.

This type of program—called Community Choice Energy (CCE)—is growing in popularity around California to help reduce energy bills and meet California’s energy goals.

Ava Community Energy (formerly East Bay Community Energy) has served customers since 2018. We are locally controlled, with a Board of Directors composed of an elected official from each city we serve, who meet publicly each month.

Local Benefits

At Ava Community Energy, one aspect of our mission is to reinvest profits directly into our community to deliver social, economic, and environmental benefits to all of our customers.

Cooking with Induction

Induction cooks food faster than traditional stoves and is just as powerful. The difference is in the technology. See for yourself! Local residents can borrow and “test drive” an induction cooktop—FOR FREE! Reserve your Induction Cooktop Lending Kit today. Go to AvaEnergy.org/induction-cooking for details.

Coming soon: Bike Electric by Ava

Our upcoming electric bike program will feature financial incentives designed to make owning an e-bike simple and more affordable.

Find the Best Incentives

Are you planning a home energy efficiency upgrade? Do you have your eye on that hot, new electric vehicle? It can be exhausting and confusing to wade through all the potential incentives, so we launched an incentive finder to help you navigate the process. Start searching at incentives.AvaEnergy.org.

Community Investing

Three times per year, Ava reviews applications for local sponsorships. We’ve funded dozens of local groups, making our service area a vibrant community. Visit AvaEnergy.org/community-sponsorships to learn more.
