

Communities We Serve

Ava Community Energy is the default electricity provider for residents, businesses, and municipal accounts in Alameda County, Tracy, Stockton, and Lathrop. All residents and businesses are automatically enrolled in Ava electricity service.

Local Leadership

Our Board of Directors includes elected officials from each city and county we serve. The Board is advised by a Community Advisory Committee, ensuring decisions are made at the local level.

Learn more about your representatives at AvaEnergy.org/governance.

Community Sponsorships

One way we invest in our community is by supporting local sports teams, arts programs, STEM education, and more with sponsorships up to \$2,500.

Learn more and apply at AvaEnergy.org/community-sponsorships.

Ava Community Energy

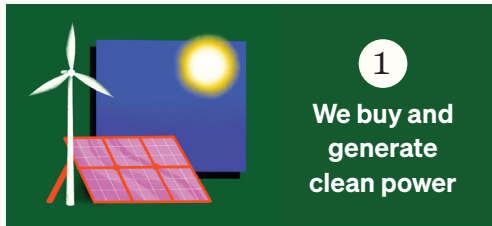

Clean power, lower rates, brighter communities.

Ava Community Energy is the local not-for-profit electricity provider serving Alameda County, Tracy, Stockton, and Lathrop.

Ava Community Energy's mission is to drive increased access to clean energy, serving the needs of our customers and the well-being of our community.

How It Works

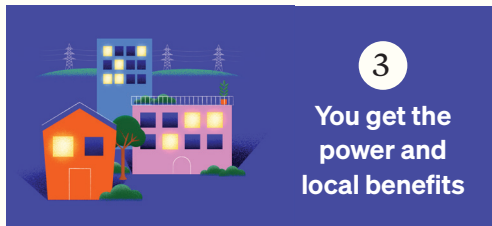

1
We buy and generate clean power

We build—and buy from—clean power plants. We sell the power to customers. If you're not on Ava service, PG&E charges you for that service.

2
PG&E delivers the power

Our power is delivered to customers by PG&E. Customers pay PG&E for power delivery as they always have.

3
You get the power and local benefits

Customers benefit from clean energy, low rates, local governance, and innovative programs.

Save Money or Go 100% Renewable

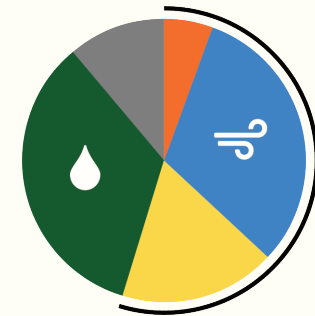

Customers are automatically enrolled in the plan selected by their city council. You can change your plan at any time. Choose 100% clean energy, choose a lower-cost plan, or return to bundled PG&E service by visiting AvaEnergy.org/change-my-plan.

Your Service Plan Options:

Renewable 100

100% renewable solar and wind energy priced at 1/4 cent per kWh above PG&E rates.

Bright Choice

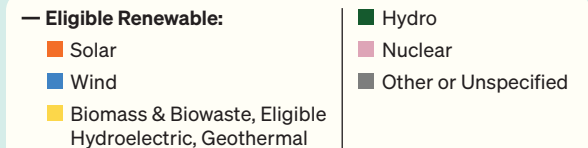

Our basic plan, priced 5% lower than standard PG&E generation rates.

Carbon-Free by 2030

Ava contracts with energy developers to build renewable power plants. We're constantly expanding our portfolio of projects to meet our goal of 100% carbon-free electricity for all customers by 2030. See where your energy comes from at AvaEnergy.org/power-projects.

The Scott Haggerty Wind Energy Center, an Ava power project, is located in Livermore, CA and produces enough electricity to power over 47,000 homes.
