Total Electricity Cost (\$/kWh)	\$0.40939	\$0.40882	\$0.42689
Average Monthly Bill (\$)	\$531.20	\$530.46	\$553.91

* This compares electricity costs for an average customer in the Ava Community Energy/PG&E service area with an average monthly usage of 1,298 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on B-1 rate schedules for **PG&E's published rates as of March 2026 and Ava Community Energy's published rates as of March 2026.**

Generation Rate is the cost of creating electricity to power your business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

PG&E Delivery Rate is a charge assessed by PG&E to deliver electricity to your business. The PG&E delivery rate depends on your electricity usage, but is charged equally to both Ava Community Energy and PG&E customers.

PG&E PCIA/FF represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to ensure that both PG&E customers and those who have left PG&E service to purchase electricity from other providers pay the above market costs for generation resources that were procured by PG&E on their behalf. "Above market" refers to expenditures for electric generation resources that cannot be fully recovered through sales of these resources at current market prices. PG&E acts as a collection agent for the FF surcharge, which is levied by the California Public Utilities Commission (CPUC) on behalf of cities and counties in PG&E's service territory for all customers. PG&E bundled customers pay the PCIA and FF fees associated with the most currently available vintage year. PG&E charges Ava Community Energy customers the PCIA and FF fees based on the year that they transitioned to Ava Community Energy service. Visit [AvaEnergy.org](https://www.avaenergy.org) for more information.
