Attachment B: Disadvantaged Community Census Tracts

All projects must be located both in Ava’s service area and no more than 5 miles from a DAC census tract in PG&E territory. DACs are defined as census tracts scoring at or above the 75th percentile (i.e., scoring in the top 25% statewide) in the California Environmental Protection Agency’s (“CalEPA”) CalEnviroScreen 4.0 tool or CalEnviroScreen 5.0 tool.

A list of eligible CalEnviroScreen 4.0 DAC census tracts in Ava’s service area is provided in the table below as initial reference, noting that all information below is subject to independent verification by respondents. This table is not intended to represent a comprehensive list of eligible DACs.

CalEnviroScreen 4.0 DAC Census Tracts in Ava Service Area
